

# Solution – Exercise IV

HiveServer 2, HiveQL via JDBC,  
Partitioning with HDFS and Hive

# Solution

## Prerequisites:

- Start Gcloud instance
- Pull and start Docker image (`marcelmittelstaedt/hiveserver_base:latest`)
- Start Hadoop Cluster
- Start HiveServer2
- Download, Install and Configure JDBC Rich-client:
  - e.g. DBeaver,
  - SquirrelSQL,
  - ...
- Execute all preparation and example tasks of previous HandsOn slides of last lecture

# Solution

## Exercise IV:

2.1 Create table `name_basics_partitioned` partitioned by column `partition_is_alive`:

```
CREATE EXTERNAL TABLE IF NOT EXISTS name_basics_partitioned (  
    nconst STRING,  
    primary_name STRING,  
    birth_year INT,  
    death_year STRING,  
    primary_profession STRING,  
    known_for_titles STRING  
) PARTITIONED BY (partition_is_alive STRING)  
STORED AS PARQUET LOCATION '/user/hadoop/imdb/actors_partitioned';
```

# Solution

## Exercise IV:

### 2.2 Use **static** partitioning to create and fill partition 'alive'

```
INSERT OVERWRITE TABLE name_basics_partitioned
partition(partition_is_alive='alive')
SELECT
    a.nconst,
    a.primary_name,
    a.birth_year,
    a.death_year,
    a.primary_profession,
    a.known_for_titles
FROM name_basics a WHERE a.death_year IS NULL
```

# Solution

## Exercise IV:

### 2.3 Use **static** partitioning to create and fill partition 'dead'

```
INSERT OVERWRITE TABLE name_basics_partitioned
partition(partition_is_alive='dead')
SELECT
    a.nconst,
    a.primary_name,
    a.birth_year,
    a.death_year,
    a.primary_profession,
    a.known_for_titles
FROM name_basics a WHERE a.death_year IS NOT NULL
```

# Solution

## Exercise IV:

### 2.4 Check Results:

```
hadoop fs -ls /user/hadoop/imdb/actors_partitioned
drwxr-xr-x  - hadoop supergroup          0 2021-02-27 17:16 /user/hadoop/imdb/actors_partitioned/partition_is_alive=alive
drwxr-xr-x  - hadoop supergroup          0 2021-02-27 17:16 /user/hadoop/imdb/actors_partitioned/partition_is_alive=dead
```

# Solution

## Exercise IV:

### 2.4 Check Results:

SELECT * FROM name_basics_partitioned WHERE partition_is_alive = 'dead' LIMIT 100									
Result									
SELECT * FROM name_basics_partitioned WH  Geben Sie einen SQL-Ausdruck ein, um die Ergebnisse zu filtern (verwenden Sie Strg+ Leertaste).									
	ABC nconst	ABC primary_name	123 birth_year	ABC death_year	ABC primary_profession	ABC known_for_titles	ABC partition_is_alive		
1	nm0000001	Fred Astaire	1.899	1987	soundtrack,actor,miscellaneous	tt0072308,tt0053137,tt0050419,tt0031983	dead

# Solution

## Exercise IV:

3.1 Create table `imdb_movies_and_ratings_partitioned` partitioned by column `partition_year` using fields of table `title_basics` and `title_ratings`:

```
CREATE TABLE IF NOT EXISTS imdb_movies_and_ratings_partitioned (  
    tconst STRING,  
    title_type STRING,  
    primary_title STRING,  
    original_title STRING,  
    is_adult DECIMAL(1,0),  
    start_year DECIMAL(4,0),  
    end_year STRING,  
    runtime_minutes INT,  
    genres STRING,  
    average_rating DECIMAL(2,1),  
    num_votes BIGINT  
) PARTITIONED BY (partition_year int) STORED AS PARQUET LOCATION '/user/hadoop/imdb/  
movies_and_ratings_partitioned';
```

# Solution

## Exercise IV:

3.2 Use **dynamic** partitioning to create and fill partition `partition_year`:

```
SET hive.exec.dynamic.partition.mode=nonstrict;
INSERT OVERWRITE TABLE imdb_movies_and_ratings_partitioned partition(partition_year)
SELECT
    tb.tconst,
    tb.title_type,
    tb.primary_title,
    tb.original_title,
    tb.is_adult,
    tb.start_year,
    tb.end_year,
    tb.runtime_minutes,
    tb.genres,
    tr.average_rating,
    tr.num_votes,
    tb.start_year
FROM title_basics tb JOIN title_ratings tr ON (tb.tconst = tr.tconst)
```

## Exercise IV:

### 3.3 Check Results:

```
hadoop fs -ls /user/hadoop/imdb/movies_and_ratings_partitioned

[...]  
drwxr-xr-x - hadoop supergroup 0 2021-02-27 17:24 /user/hadoop/imdb/movies_and_ratings_partitioned/partition_year=1874  
drwxr-xr-x - hadoop supergroup 0 2021-02-27 17:24 /user/hadoop/imdb/movies_and_ratings_partitioned/partition_year=1878  
drwxr-xr-x - hadoop supergroup 0 2021-02-27 17:24 /user/hadoop/imdb/movies_and_ratings_partitioned/partition_year=1881
